Projects

Sales Data Analysis – Analyzed sales trends using Python (Pandas, Matplotlib) to identify top-performing products and regions.

Hospital Management Analysis – Used Pandas to explore patient data, length of stay, and billing trends for insights.

Dental Distributor Management – Used SQL to manage the data of a dental distributor to create various tables and identify monthly sales, highest selling products and to track salesman performance.

Inventory Management – Using SQL worked on various data of stocks. Identified top selling items, total revenue generated, current stocks after sales.

Food & Catering Website – Designed and developed a website for food and catering services.

Vehicle Information Website – Developed a website to showcase vehicle information.

Netflix Clone – Designed a Netflix clone using HTML and CSS.

Weather App – Developed a weather application using HTML and CSS.

Experience

• Medical Sales Analyst at Orikam (Dental Equipment's Supplier).

• Trainer at Udhyaretech Systems – Conducted ADCA & DCA computer courses.

• Web Development Intern at Websprinters – Assisted in website design and development.

Certifications & Courses

• AWS Certification – Completion certificate from Amazon Web Services

• Advance Diploma in Computer Applications (ADCA)

• Video Editing Course – Completed

• Data Science with Python

• Python Basics – Completed

• SQL – Completed

• Machine Learning - Completed

Co-Curricular Activities

• RSP Cadet – Participated in Republic Day parade for 2 years.

• Sports: Swimming and Skating.

Strengths

• Quick learner and adaptable

• Strong analytical and problem-solving skills

• Enthusiastic about continuous learning
